Chapter - 10
Selectors in JavaScript

Selectors are used to select html elements to perform some task and actions on html elements.

There are so many Selectors in JavaScript .

1. **getElementsByTagName()** : select HTML element through tag name.

2. **getElementsByName()** : select HTML element through the value of name attribute.

3. **getElementById()** : select HTML element through the value of id attribute.

4. **getElementsByClassName()** : select HTML element through the value of class attribute.
